

Project Design Phase-II
TechnologyStack(Architecture&Stack)

Date	7 march 2026
TeamID	SWTID-2026-7607
ProjectName	MicroGoal
MaximumMarks	4Marks

TechnicalArchitecture:-

Table1:-

S.No	Component	Description	Technology
1	UserInterface	APItestinginterfacefor sending requests	ThunderClient
2	Application Logic-1	Userauthenticationand account management	Node.js+Express.js
3	Application Logic-2	GoalCRUDoperations and data processing	Node.js+Express.js
4	Authentication Layer	Tokengenerationand verification	JSONWebToken (JWT)
5	Database Layer	Storeusersandgoalsdata	MongoDB+Mongoose
6	Middleware Layer	Route protection and centralizederrorhandling	ExpressMiddleware

Table2:-

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	Backenddevelopmentframe work	Node.js,Express.js
2	Database	NoSQL database for storingstructureddata	MongoDB
3	Security	Secure API access using token-basedauthentication	JWT
4	API Communication	RESTful API using HTTPmethods(GET,POST,PUT,DELETE)	Express.js
5	Scalable Architecture	ModularMVCstructurefor future expansion	MVCPattern
6	APITesting	Endpointvalidationanddebug ging	ThunderClient
